

Webmap Instructions v4.5a

Built using Google's JavaScript 3.x API

1. The map can be zoomed in and out by the + and – on the bottom. You can also use the scroll Wheel on your mouse or double click on the map. Once you click on a parcel the Print details button(2) Will come up and data should be populated on the right hand side of the map. This will print the info that is on the right hand size. The Print map prints what ever data is on the far northwest corner. It is suggested that you use Firefox, safari, edge or Internet Explorer 11+ if you want to print the aerial imagery.
2. The query tools vary by county, but in some you can select the number of beds and baths. You might Also be able to look at comp values for improvement, land and total.
3. The clear map clears the map except the measurement tool pins.
4. Keep checking back we will be adding more to these instructions as this system advances.

1. Print Map
2. Print Map details (autozoom)
3. Search by Address (autozoom)
4. Search by Name
5. Query items (Varies depending on county)
